

BIS-Sahayak — RAG Research Documents

Official-source research pack for the BIS-Sahayak Intelligent Assistant project

1. BIS Legal & Regulatory Framework

This section provides the legal and regulatory foundation for BIS-Sahayak.

Core official documents include the BIS Act, 2016; BIS Rules, 2018; Bureau of Indian Standards (Conformity Assessment) Regulations, 2018; and BIS (Hallmarking) Regulations, 2018.

RAG rule: use the latest official BIS document/version for legal or compliance answers. Retain amendment history and cite the exact document and section/page where available.

Official source: <https://www.bis.gov.in/the-bureau/bis-act-rules-and-regulations/?lang=en>

2. Indian Standards & Know Your Standard

BIS's Know Your Standard service supports searching by IS number or keyword/product name and provides associated information such as the standard PDF, amendments, Gazette notifications, Scheme of Testing and Inspection, licences, laboratories, classification and committee information.

For each standard, store: IS number, title, scope, product/category, status, revision/reaffirmation, amendments, effective date, product manual, SIT, related QCO, laboratories, source URL and page/section reference.

Official sources: <https://www.bis.gov.in/know-your-standard/?lang=en> and <https://standards.bis.gov.in/>

3. Product Certification, QCOs & Licensing

BIS product certification information covers grant of licence, non-conformity, surveillance, renewal, retesting, change in scope and other certification procedures.

Certification is generally voluntary, but the Central Government can make compliance compulsory through Quality Control Orders (QCOs). Therefore, the RAG must distinguish between an Indian Standard existing for a product and certification being legally mandatory.

Store QCO title, issuing ministry/department, product, Indian Standard, scheme, Standard Mark requirement, effective date, exemptions, amendments and current status.

Official sources: <https://www.bis.gov.in/product-certification/product-certification-process/?lang=en> and <https://www.bis.gov.in/product-certification/products-under-compulsory-certification/?lang=en>

4. Product Manuals, Testing & Laboratories

BIS publishes product manuals, Scheme of Inspection and Testing (SIT), grouping guidelines and product-specific certification guidance.

Product manuals may contain scope, sampling, test equipment, testing requirements and scheme-specific requirements.

BIS laboratory services provide information on BIS laboratories, recognized/empanelled laboratories and Indian Standard-wise testing facilities. BIS LIMS provides laboratory details and testing scope.

Official sources: <https://www.bis.gov.in/product-certification/product-specific-information-2/?lang=en> ;
<https://www.bis.gov.in/laboratorys/laboratory-services-overview/?lang=en> ; <https://lims.bis.gov.in/>

5. Hallmarking & Consumer Services

BIS maintains official information on hallmarking regulations, mandatory hallmarking orders, jeweller registration, hallmarking centres, consumer protection and hallmarking FAQs.

Mandatory hallmarking requirements can change through amendments, so the RAG should retain order date, amendment date, product/category, applicable area, effective date, exemptions and current status.

BIS consumer information covers complaints concerning BIS-certified products, hallmarked products, misuse of the Standard Mark, Quality Control Order violations and BIS services.

Official sources: <https://www.bis.gov.in/hallmarking-overview/mandatory-hallmarking-order/?lang=en> ;
<https://www.bis.gov.in/consumer-overview/consumer-protection/?lang=en>

6. RAG Metadata & Governance

Every RAG document/chunk should contain: document_id, title, document_type, source_organization, source_url, publication_date, effective_date, revision_date, amendment_number, IS_number, product, scheme, clause, page_number, language, status and last_verified.

Use semantic chunks such as section, clause, sub-clause, requirement, procedure step or table row.

Source hierarchy: official BIS legal/regulatory PDF; official Government notification/QCO; official BIS standard/product manual/SIT; official BIS portal/database; official BIS FAQ/guidance.

Do not use unofficial websites as authoritative compliance evidence.

If retrieved information is insufficient, the assistant should not invent an answer. It should ask for missing details or state that the available official source is insufficient.

Core principle: One Query → One Traceable BIS Source → One Actionable Workflow.

Recommended RAG Dataset Structure

Category	Recommended contents
Legal	BIS Act, Rules, Conformity Assessment Regulations, Hallmarking Regulations
Standards	Selected IS standards, amendments, scope, clauses, status
Certification	Certification process, product manuals, SIT, grouping guidelines
QCO	QCOs, amendments, products, effective dates, exemptions
Laboratories	Lab name/code, scope, IS numbers, validity, testing facilities
Hallmarking	Orders, amendments, HUID, FAQs, consumer guidance
Consumer	Complaint procedure, consumer protection, BIS services
Governance	Metadata, source hierarchy, versioning, citation and fallback rules

Important: This research document is a structured summary for the project knowledge base. For production compliance answers, ingest and cite the current underlying BIS PDFs, standards, QCOs, amendments and official databases.
